

## Global Market Leader in Chemical Distribution, Halifax

ACC Flooring successfully secured the order to provide enhanced health and safety flooring solutions to a global market leader in chemical distribution with over 185,000 customers in all markets worldwide.

The areas to their warehouse required designated pedestrian routes, refurbishment to alleyways for High Reach Truck traffic and storage for pallets and the High Reach Truck.

Altro Tect high build epoxy coating from Altro Resins in Gunmetal was applied to the Warehouse including into the alleyways with Safety Yellow installed to define pedestrian crossings and storage areas.

AltroLine in Safety Red was applied to define the PPE Line within the warehouse. AltroLine in Safety Yellow was applied to create a designated walkway.

Altro Tect is an ideal flooring solution for warehouses, general industry, vehicle workshops and medium duty areas as it benefits from a fully sealed surface, low odour, good chemical resistance, good abrasion resistance, high gloss finish and ease of cleaning. With a manufacturer's guarantee of 3 years warranty and life expectancy of 5-7 years, Altro Tect provides cost effective benefits for both new and refurbishment projects.

AltroLine from Altro Resins is available in Safety Yellow, Safety Red, Black and White is a high visibility line marking system ideal for defining walkways, isolated areas, spaces and zebra crossings and is the perfect solution for health and safety areas where high visibility demarcation is paramount.

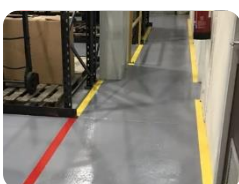

The client was delighted with the installation which was carried out during weekend hours causing minimal downtime to their operation.
